

Participating in the GS1 Open Seminar

March 28, 2025

GS1 Open Seminar

We participated in an open seminar hosted by the GS1 Healthcare Japan Association.

Date and time: Tuesday, March 11, 2025, 13:00-17:00 (corporate exhibition: 11:30-17:30)

Venue: KFC Hall (International Fashion Center Building, 1-6-1 Yokoami, Sumida-ku, Tokyo)

We exhibited the UV-1, a UV laser marking device for surgical instruments, and the UV-Scan scanner.

The UV-1 is extremely compact, energy-efficient and a laser safety Class 1 product.

UV-Scan is equipped with an AI camera and has lighting that is suitable for metal reflections to ensure high reading accuracy.

Mass production is scheduled to begin around summer 2025.
